PROFESSIONAL SUMMARY

Early-career IT professional with 2+ years of enterprise IT and application support experience, strong in N2 troubleshooting, incident management, and SLA across ServiceNow, the Microsoft ecosystem, and SAP, backed by SQL and Python/PowerShell automation. Also builds enterprise applications through real full-stack projects, with additional exposure to cloud and AI. Fluent in English and used to multicultural support environments.

CORE TECHNICAL SKILLS

IT & Application Support	N2 Technical Support, Application Support, Troubleshooting, Incident Management, SLA Management, ServiceNow
Microsoft	Microsoft 365, Entra ID, Active Directory, Intune, Teams, SharePoint, Windows
Enterprise Systems	SAP, Sienge ERP
Infrastructure	Windows Server exposure, DNS, DHCP, TCP/IP, Endpoint Security
Programming & Automation	Python, PowerShell, SQL, TypeScript, JavaScript
Application Engineering	React, Node.js, Express, REST APIs, PostgreSQL / Supabase
Cloud & AI	Google Cloud, Google Gemini

PROFESSIONAL EXPERIENCE

CBI 06/2026 - Present

IT Analyst

- Manage technology vendor and partner relationships, including sourcing suppliers, evaluating corporate solutions, preparing quotations, and supporting technology contract negotiations.
- Contribute to a proprietary AI initiative (Isa, built on Google Gemini) by modeling business-oriented behavior, interaction rules, and user-facing presentation aligned with the company technology strategy.
- Engage with technology partners, including a Microsoft partner relationship through SouCloud and participation in the Google Cloud Summit, to evaluate enterprise solutions and trends.
- Support Microsoft server infrastructure evaluation and environment configuration planning for a confidential enterprise project, and support Sienge ERP operations in fiscal and operational contexts.

Farmamed 10/2025 - 03/2026

IT Support & Infrastructure Analyst

- Delivered N2 technical support and application troubleshooting through ticket management, SLA follow-up, incident resolution, and recurring issue analysis.
- Administered Microsoft 365, Entra ID, and Active Directory, including identity management and user provisioning.
- Managed endpoint and access operations with Microsoft Intune, covering device compliance and access control.
- Developed Python scripts to automate repetitive tasks and produced technical documentation to improve support workflows.

Wobben Windpower 11/2023 - 04/2025

IT Support & Infrastructure Intern

- Handled high-volume enterprise IT support through ServiceNow, including ticket routing, incident management, and SLA compliance.
- Assisted technical and non-technical users across Microsoft 365, SAP, and Active Directory, including user onboarding and access requests.
- Provided phone and remote support (AnyDesk, TeamViewer), resolving application and system issues and maintaining the knowledge base.
- Built a foundation in enterprise and application support, incident management, and networking fundamentals (DHCP, DNS, TCP/IP).

SELECTED TECHNICAL PROJECTS

Onboarding OS

In development, target delivery by end of 2026

- Building a full-stack HR onboarding platform (React 19, TypeScript, Node.js, Express, PostgreSQL / Supabase) with REST APIs and a state-machine-based admission workflow.
- Designed multi-tenant data isolation with PostgreSQL Row Level Security, layered application security, and electronic-signature integrations via webhooks.

Internal Ticketing System

Approaching beta release with 22 pilot users

- Developing an internal ticketing application (Next.js 16, React 19, TypeScript, Supabase) with a full ticket lifecycle for pilot users.
- Built role-based access control, SLA tracking with breach detection, audit events, and an AI support assistant powered by Google Gemini 2.5 Flash.

EDUCATION

Systems Analysis and Development - SENAC

Graduated: July 2026

SPECIALIZED PROGRAMS

AI & Emerging Technologies: Digital Twin in 5G | *UniFacens / Softex / Ministry of Science and Technology, Brazil*

- Selected through competitive admission with a full scholarship for a 12-month federal program covering AI, Machine Learning, Embedded IoT, Mixed / Virtual Reality, and 5G.

CERTIFICATIONS

- CCNA 1: Introduction to Networks - Cisco
- Network Security - Cisco
- Endpoint Security - Cisco
- Certified AppSec Practitioner (CAP) - The SecOps Group

LANGUAGES

- Portuguese - Native
- English - Fluent / C1+
- German - Currently Studying

VOLUNTEER EXPERIENCE

- Volunteer English Teacher, CPSO - Taught English to students of different levels and nationalities, including a learner from Thailand, practicing communication across cultures.
- Campus Expert / University Ambassador (Digital Innovation One); Committee Member (Instituto de Defesa Cibernética).
